

TECHNICAL ARTS MINISTRY

PURPOSE

Encompassing the technical areas of sound, light, and visual aids, those in the Technical Arts Ministry seek to provide superior audio and visual presentations in conjunction with the Worship Team Ministry in order to help others express their love to God through worship.

DESCRIPTION

- Our Technical Arts teams consist of individuals who have committed their lives to Christ and who joyfully serve Him using their spiritual gifts, learned technical abilities and diverse experiences to magnify and proclaim His worth and truth to the community and fellow believers.
- As an integral part of the Music Ministry, we work in large with the Worship Team Ministry to provide quality technical services to the programming needs of the worship team and pastoral staff with the common goal of enhancing the worship experience and pastoral sermons.
- Our Technical Arts teams regularly serve on Sunday weekend services, special praise & worship events, conferences and seasonal presentations (Easter Service, Baptism Services, Christmas Services).

If you like technical challenges (audio, lighting, or visual power point presentations), have a servant's heart, and, above all, are committed in serving and growing in Christ, then check out the technical arts ministry. No experience is required, all training is provided.

SPIRITUAL GIFTS/ABILITIES

Encouragement, Evangelism, Hospitality, Leadership, Praying and Service.

MINISTRY OPPORTUNITIES

We are always looking for people who have a passion for the technical side of worship. If you have interest in serving the Lord in this area, please consider your involvement in this ministry.
